

A Word from Johnos

Although not many champion ribbons at Johnos, you will find some of the best carcass and commercial sheep here, backed up by winning the interbreed maternal lambplan class at Hamilton in 2012. We are sure our clients would be very happy with our focus for their breeding programs. For us to survive in the seed stock industry our business relies on the success of our producers businesses and that is our aim. Structural soundness, good shape on a deep carcass combined with high performance traits of growth and fertility make up the basis of our selection criteria. Harder to measure traits of milk production also remain a focus while maintaining a softer good wool cutting fleece also for improving skin quality. The industry now requires fast early growth and a moderate size mature ewe. Selecting the right Border rams can have the benefits of producing wether lambs you can finish in a reasonable time, and produce a ewe that will wean a high percentage of lambs that can be finished quickly as suckers when mated as a lamb. Our stud sires combine the traits so this can be achieved and are amongst the top performing sires in the country. These sires are well benchmarked through the use of industry trials and the young sire program in the \$SuperBorder\$ group.

At Johnos we are offering 2 excellent options in your breeding programs to help maintain and improve the lamb industry in Australia. We are doing the hard work for you, consistently benchmarking our performance to keep the commercial operation simple for our clients, all you have to do is breed and feed your lambs, and the genetics provided will do the rest.

We are committed to selecting and using sires of high commercial relevance.

The rams will be presented in good working order with Lambplan ASBV data on each animal. 150 Border Leicester and 20 Hampshire downs rams will be offered at our 14th annual Sale on the Monday 24th September 2012 at 11am.

Cadel I 070850

Bindaree 090225

Moton 090200

The Hulk 060369

Johnos Wombota 080537

We have had a shift in this years drop of sale rams with the introduction of 2 sires with little information (Bindaree 090225, & Morton 090200) and an interesting exercise with the AI of some older Champions of their day (Fraser James, Chandivan Justin and Otago Victa) While their figures have had an effect on our sale rams you will notice the progeny from these sires very well grown. The sires were purchased for their length and frame of which they were exceptional. As time goes on their figures will change as their daughters start breeding. Kelso 09L021 and Inverbrackie 090142 were allocated to us in the Group Improvement Program.

52

Hampshire Downs rams have been the terminal sire choice for Johnos, **but watch this space!** The Hampshire's are well suited to the modern lamb industry without losing valuable meat and skin values. Because the Hampshires have been bred to a type they produce a reliable line of quality lambs, they are sort after by the most discerning buyers for quality butchers and restaurants.

We chose to breed Hampshires as we believe they produce a great second cross lamb from a Border Leicester merino cross ewe, the most consistent prime lamb dam. The purchaser from meat outlets demand a reliable consistent product, the Hampshire with years of stability can provide this. The Hampshire has great conformation, meat yields and skins and we aim to maintain and improve these traits. Because of these traits things like lambing ease, fertility, mothering and production of a good even early line of lamb's results.

Calm before the storm, showing can be very entertaining
