

Johnos Focus on Production and clients

SHEEP at Johnos will be well grown at the Shows and annual sale this year.

A good season of pasture growth has ensured liveweights will be up and the entries from the sheep breeding Johnson brothers are no exception.

Jeff and Neil Johnson will once again support the major and a few local shows this year their high performing Borders tagged as ‘SuperBorder’ Border Leicesters and Hampshire Downs. They have so far exhibited the reserve champion Border Leicester ram and champion maternal performance class at Hamilton sheepvention, along with champion Hampshire Down ewe at both Bendigo and Hamilton along with reserve ram at both shows.

“We’ve got a pretty good team of Hampys this year, with their liveweights better than last year’s sheep with little preparation showing their ability to convert feed to meat”.

“There are a pretty smart rams out of one of our sires – Johno’s 911,” Neil Johnson said.

“He has put balance and a bit of style in his progeny while maintaining meat qualities.

“Instead of having just a meaty sheep, you have a good looking meaty sheep.”

Mr Johnson said there was strong demand for Hampshire Down rams among southern first cross flocks with the lambs valued for their early growth and consistent meat yield.

Jeff Johnson said the stud showed the breed’s reserve champion ram and champion ewe at the 2011 Royal Sydney Easter Show. As a lamb buyer for Geelong processor M.C.Herd, Mr Johnson said Hampshire Down lambs had never let him down for carcass yield and length of loin.

“They are an easy lambing, quick growing lamb with a big eye muscle.”

The stud sells about 45 to 50 Hampshire Down rams each year.

“The problem is, we have haven’t got enough rams to sell.

“We have been selling ram lambs to keep up with demand.”

The stud’s Border Leicester show entries had more growth and style compared to previous years under the influence of outside sires that have “meshed” well with their stud ewes.

“We’ve introduced a new family line.”

Although Johnno's Border Leicesters and Hampshire Downs are both recorded under Lambplan, the Johnson brothers are always ready to test and prove unmeasured genetics through their flock. About two thirds of Border Leicester flocks in Australia are unrecorded for traits under Lambplan, representing a huge untapped genetic resource in the breed ranks.

Mr Johnson said the outside Border Leicester sires were untested for carcase or other traits under Lambplan, but their progeny have measured well under the program.

"Our flock is big enough that we can take a bit of hit with untested sires while searching for improvements, there will often be high performing sons and daughters as a result".

Mr Johnson said joining the SuperBorders group had given Border studs a bit of brand and recognition, but importantly had given ram clients an opportunity to market their first cross ewes at sales. SuperBorders are Border Leicester rams ranked by Lambplan to have superior genes for lamb production, with SB rams identified by trademarked round yellow ear tags and progeny with special sale cards. Johnos will have a high percentage of qualifying rams again this year.

SuperBorder breeders select for better growth rates, increased fertility, milking, improved carcase traits, controlled fat and better muscling.

Mr Johnson said shows were important places to compare and identify new genetics. Many events also had performance classes for recorded sheep.

"So obviously we are pretty keen participators in those events."

Growth rate and fertility are obviously the strong points of Superborders, while also trying to improve other traits such as worm egg count and muscling.

"The future for Border Leicesters is to improve the good qualities that the first cross ewe has.

"As long as we can improve the carcase traits, so that we have better market for young wether lambs, which is obviously half of the equation."

Keep your eye on first cross ewes from Johnos genetics both at first cross sales and private sales. Repeat buyers have identified high performance and excellent growth rate to support Johnos clients.

There will be a selection of sires offered at the annual sale on Mon Sept 26th in a line up of approximately 150 Borders and 25 Hampshire rams. Also sires will offered at Horsham in November.
